COLOUR AND GRAIN

Colour and grain characteristics in this product reflect the natural variation found in rustic-grade oak. Expect a wide range of tones, shading, and texture across the boards, and ensure boards are mixed thoroughly during installation to achieve a balanced overall appearance. Rustic oak showcases strong natural character, including prominent grain patterns, longer medullary rays, and occasional crotches, swirls, and burls. You will also find natural knots, cracks, and structural features that have been professionally repaired and filled to maintain stability while preserving the authentic appearance of the timber. Plain-sawn boards may display plumed or flared grain formations, further enhancing the lively, varied look. This inherent diversity in colour, figure, and grain is an intentional and defining feature of rustic wood flooring, contributing to its warm, natural charm.
